### From the past into the future

What began in 1938 as a small library and documentation centre staffed by four researchers has grown into a unique special library collecting a broad range of materials. The IBFD Library and Information Centre is now regarded as the world's leading resource facility in the field of international and comparative taxation, and it plays an important role in serving the international tax community.

In our Library, you will find historical materials dating back to 1811, as well as the most recent

publications in the field of (international) taxation. Our collection contains documents from all over the globe, and it continues expanding.

### Connection with other libraries and institutions

We are actively involved in a variety of library associations (and similar institutions), and we continuously grow our network of friends from and within the (international) tax world.
